

Hello! Welcome to the web designer evaluation.

Mockup a Homepage

I will be giving you a mock scenario of notes provided from a retailer where you will need to create a home page design based on their preferences/requests.

- This is an Appliance Dealer [Bob's Appliances] that does not have a logo. They have asked for you to create a new logo and are open to the design. Please make sure that it still follows their color scheme.
- Their store colors/uniform colors are green, black, gray, and white.
- Special Requests:
 - They really want to feature KitchenAid. Please create a hero image that focuses on a kitchen suite of this brand with a call to action.
 - They would like a Shop by Category section with bringing focus to: Cooking, Refrigeration, Laundry and Grilling
 - They would like to really highlight that they are offering financing options to their customers – their main one is Synchrony Financial.
 - A few other things they'd like to feature on the home page would be the Rebate Center, White Glove Delivery, and Service & Repair
 - They would also like to display a couple of their featured brands somewhere on site: KitchenAid, Whirlpool, Amana, Maytag, Electrolux, and Frigidaire. (Note: you can create a faux slider with the images provided – arrange them using the Bootstrap grid structure.)

RULES

- Please use the Bootstrap classes to create a responsive design that works across mobile, tablet and desktop.
- You may rearrange the content on the page however you like.
- You can remove/add more sections if you feel necessary.
- Find brand appropriate images when needed – you can look at the manufacturer site or even Google
- For all other imagery, you can use whatever you like as long as it conveys or relates to the verbiage/ad.
- You can create your own filler text for sections.
- Be Creative! Don't be afraid to think outside of the box.

Please let me know if you have any questions or concerns!
